EDUCATION

Halic University

Computer Engineering Degree
(English) 2020-2025

PROJECTS

destek.fakir.com.tr

- Designed and launched new marketing campaigns, incorporating updated visuals and branding strategies.
- Driving their digital transformation and closely liaising with the digital transformation team.

simandroz.com

- Developed the full-stack e-commerce site Simandroz.com, handling front-end, back-end, and database from scratch.

aktifneser.com.tr

- Developed a multi-language corporate site with SEO and product catalog features.

melektemelek.com

- Built a responsive portfolio site with custom CMS for artwork showcasing and updates.

calderarev.com

- Delivered a responsive business site for a US real estate consulting firm.

hlbsadikoglu.com

- Created a modern company website with project gallery and admin panel.

EXPERIENCE

Software Developer | EKON Yazılım & Teknoloji

March 2025 - Present

- Writing modular, testable code with attention to performance and reusability.
- Building a dynamic CMS admin panel using C# (.NET) for backend logic and HTML/CSS/Javascript for the frontend.
- Developed RESTful API endpoints in .NET to manage dynamic content and user interactions within the CMS.
- Write clean and well-documented code, following best practices.

Software Developer | QAPERA

July 2024 - August 2024 | Internship

- Developed front-end components and features using Angular within a customer relationship management (CRM) system.
- Consumed and processed RESTful APIs to display dynamic data on the client side.
- Implemented reusable UI elements and improved data presentation and responsiveness.
- Collaborated with the development team in an agile environment and participated in code reviews and sprint planning meetings.
- Integrated third-party libraries (e.g., PrimeNG) to accelerate UI development and ensure design consistency.
- Debugged and resolved UI/UX bugs to improve overall user experience and interface stability.

Full Stack Developer | Webbilir

June 2022 - December 2023

- Worked as a full-stack developer in E-Commerces and landing page projects. Developed dynamic and responsive web applications with .Net multi layered architecture.
- Strong knowledge of using OOP, Loosely coupled systems and Design Patterns (Unit Of Work, Dependency Injection, Disposable pattern, Constructor overloading)
- Integrated payment systems (Authorize.net, lyzico, Paytr, Garanti) for subscription-based services.
- Used database first approach with Entity Framework and MS-SQL server.
- Consumed APIs (Infobip, SAP) for messaging and invoice data transfers.
- Created and maintained SQL stored procedures, views for complex business logic.
- Optimized application performance by profiling queries and refactoring inefficient code blocks.
- Participated in requirement analysis and client meetings to ensure alignment between business needs and technical implementation.
